PROJECTS

QuickSpace – SaaS Commercial Website | React, Tailwind CSS, Framer Motion

- Developed a professional, conversion-focused SaaS landing page for QuickSpace, highlighting product features, pricing, testimonials, and call-to-action sections using React and Tailwind CSS.
- Integrated Framer Motion for smooth animations and micro-interactions, enhancing user engagement and visual appeal.
- Ensured mobile-first responsive design, optimized performance, and accessibility across devices and browsers.

FoodieX – Recipe Sharing Website | Django, Python, Bootstrap

- Built a dynamic recipe-sharing platform using Django and Python, allowing users to explore, search, and manage a variety of categorized recipes.
- Implemented user authentication and CRUD functionalities for recipes, enabling users to register, log in, and manage personal recipe collections.

Shop.co – E-commerce Website Frontend | React, Tailwind CSS

- Developed a fully responsive and visually appealing e-commerce frontend for Shop.co using React and Tailwind CSS, focusing on modern design and user experience.
- Implemented core UI components including product listings, category filters, product detail pages, shopping cart, and navigation bar.

Acenda Travel – Travel Booking Website Frontend | React, Tailwind CSS

- Designed and developed a responsive travel booking website frontend using React and Tailwind CSS, delivering an engaging user experience for exploring destinations, booking trips, and viewing travel packages.
- Built reusable UI components including search forms, destination galleries, booking calendars, and user reviews with React's state management and props.
